

Karim Sharifullin

Data Engineer

📧 @pukeron89

✉ karimsha1801@gmail.com

📍 Moscow, Russia (*Open to relocation*)

👤 Professional Summary

Data Engineer with experience in **building and maintaining ETL pipelines** for financial data. Skilled in data acquisition (REST API, web-scraping), processing, and integration to create structured datasets for analytics. Developed financial reports and dashboards in Power BI and DataLens to support business decisions. **Proficient in Python, SQL, and data quality monitoring.**

⚙️ Key Skills

Languages & Databases: Python, SQL (PostgreSQL, Hive, Impala), Hadoop

Tools & Technologies: ETL, REST API, Web Scraping, Power BI, DataLens, Docker, FastAPI, SQLAlchemy, Alembic

Cloud: Google Cloud Payment, Amazon S3

Methodologies: Data Governance, Data Quality, Data Modeling, Data Cleaning and Integration, Big Data

🏢 Experience

Alfa-Bank

June 2025 — Present: *Data Engineer / Moscow (Hybrid)*

- Loading and processing data for analytical systems, supporting regular ETL processes.
- Monitor and improve data quality across analytical systems.
- Work includes tracking key metrics (PSI, averages, partition availability)
- Developing advanced controls — including gradient boosting and time series-based models — to detect data drift and inconsistencies.
- Develop technical checks for data marts and sources — ensuring data completeness, freshness, and uniqueness.

Stack: Python, SQL, data loading tools

NurFinance

April 2024 — May 2025: *Data Engineer / Kazan (Remote)*

- Automated data acquisition: developed and supported web-scraping tools and REST API integrations.
- Cleaned, combined, and structured data from multiple sources to create data marts and summary datasets.
- Conducted financial analysis with a focus on KPIs (revenue, expenses, profitability).
- Created clear financial reports and dashboards in Power BI and DataLens.

Stack: Python, REST API, Microsoft Power BI, Yandex DataLens, SQL

Private Practice / Freelance

December 2023 — June 2024: *Python Back-end Developer*

- Implemented caching to speed up a Telegram fitness bot.
- Configured background tasks (new workout notifications, reminders).
- Integrated subscriptions using Google Cloud Payment and a scalable file storage on Amazon S3.

Stack: Redis, Celery, FastAPI, Google Cloud Payment, Amazon S3, Docker

Private Practice / Freelance

July 2023 — December 2023: *Python Back-end Developer*

- Developed a web service with user registration and authentication (OAuth 2.0, JWT).
- Designed a comprehensive database schema (chat messages, user profiles, logs).
- Implemented an online chat with an AI assistant based on the GPT API.

Stack: FastAPI, PostgreSQL, SQLAlchemy ORM, Alembic, GPT API

🎓 Education and Certificates

Higher School of Economics

Degree: Computer Science and Data Analysis

Istanbul University

Program: Bachelor's degree, Economics (2 years)

Data Science Course by Tinkoff

Issued: June 2022
